

Anti counterfeiting tracing of tobacco, alcohol, and tea

Establish a liquor anti-counterfeiting traceability management system, achieve three codes in one, and correspond the label anti-counterfeiting code, logistics code, and packaging box laser code; The label adopts various anti-counterfeiting technologies such as QR codes, which are difficult to counterfeit. By taking QR codes with a mobile phone, the anti-counterfeiting effect is improved, and the traceability information is intuitively transmitted to market inspectors and consumers. Search for product traceability information using the QR code on the surface of the mobile phone code box label. NFC of ordinary mobile phones uses enterprise customized software to read electronic tags, and thoroughly solves the problem of high-end Baijiu anti-counterfeiting.

悠久立信一直专注于提货系统、防伪系统等企业信息化软件解决方案。
