

Mika Seed Recognition Order Management System

Mika Seed Recognition Order Management System

Shanlianghui, founded in 2013, is a large health enterprise engaged in the research and development, production, and sales of high-quality organic main grains, restoring the true essence of grains and safeguarding the source of life. At present, the company has established a comprehensive organic agriculture industry chain that integrates seed research and development, organic fertilizer, organic planting on black soil, deep processing of organic rice noodles, sales, catering, education, and more. We have laid out a diversified business system across industries such as seed, food, catering, and kitchen equipment. By implementing a safe and transparent planting and product traceability management system, we ensure consumer confidence in product quality. And collaborate with national excellent organic agricultural product growers and planting units to sell under the Shanlianghui brand and establish a comprehensive membership service process. The company's flagship products include organic seed active germ rice, organic millet noodles, and fully intelligent wall breaking cooking machines. Good products can peacefully nourish life vitality, add points to health, and help more people regain their health from the dining table. Shanlianghui has always adhered to: Undertake social responsibility, contribute to food safety, and focus on protecting the black soil, Let more people eat safe and healthy Shanlianghui seed germ rice!
